CORPORATE PRESENTATION

Our Company

Vitamex, At the heart of feed.
 The quality of your food starts with healthy feed.

Never before has the consumer been so aware of the **impact that his food has on his health**. Never before has the consumer been so critical about the safety of his food. And rightly so!!

Vitamex, one of the key players in the Benelux in the market of feed ingredients and additives, is playing an important role in the consumer's well-being.

Its first aim is to create an **economical and technical added value** for animal feed producers, integrators and home-mixers. The ultimate goal, however, is to **contribute to the safety of the entire food chain** and to contribute to the health of the animals. To be and remain at the heart of feed.

From its headquarters in Drongen (near Ghent, Belgium), **Vitamex** is active in **more than 50 countries worldwide**.

It has subsidiaries in Belgium, The Netherlands, Spain, Poland, Hungary, Ukraine and China. Today, **Vitamex** has over 400 employees.

“Work on healthy, safe and nutritional ingredients”

Our Products

Healthy feed, for every phase of the animal's life.

Vitamex is focused on developing functional supplements and innovative nutritional concepts for different kinds of animals. It has earned worldwide renown as a specialist in **starter feed for pigs and poultry**.

Babito, Babipops and Galito are generally recognised as the best formulations on the market for young animals. **Vitamex's** neonatal feed guarantees the animals maximal chances of survival, optimal health and rapid growth, right from the start.

The Vitasow product range is dedicated to the **raising of highly productive sows** and combines years of practical experience with our scientific knowledge. In the further life of the animals as well, our **premixes and protein concentrates for pigs, poultry and cattle** are well known for:

- better feed intake
- better digestion
- stronger health
- lower mortality
- faster growth

The introduction of the Aromabiotic® product range based on a combination of medium chain fatty acids and developed in-house - was a **revolutionary intervention in the food chain**.

“ **Starter feed, protein concentrates and premixes for healthy and strong animals** ”

Our Ambition

Innovation, quality, market orientation. Get more than expected.

In food safety, **quality and traceability** are of major importance. **Vitamex** has obtained the GMP, HACCP, Q&S, A-futter, GMO-controlled production, antibiotic-free and animal-protein-free production **quality labels** and is compliant with the strictest EU regulations. Our tracking and tracing system is absolutely secure.

Vitamex's most important asset is its **innovation**. **Progressive, fundamental research** in its own lab at Nutrition Sciences has already yielded several patents. Applied research is conducted in cooperation with renowned laboratories, universities and research institutes all over the world. Moreover, Nutrition Sciences participates in the EU framework programmes.

Vitamex adheres to the principle of "from science to practical solution": the development of new products is always guided by a **focus on the physiology of the animal and the needs of the market**.

A team of professionals is always ready to provide technical, nutritional and veterinary support. With our WinMix™ software, you can calculate and

produce the optimal feed compositions according to your animals' specific needs. By mutual consent, we can adapt our products to your particular industrial situation. Our concepts are built to **fulfil the ever-changing expectations of the feed market**.

“ **The development of new products is directed by the needs of the market.** ”

At the heart of feed

**Starter Feed • Quality • Protein Concentrates • Innovation
Premixes • Flexibility • Worldwide**
